RENE ANDERSON

FULL STACK DEVELOPER

PROFILE - ABOUT ME

- Positive, enthusiastic, and fast learner.
- Productive and collaborative team player with strong interpersonal skills.
- Versatile and eager to take on new challenges.
- Strong research, analytical, and problem-solving skills.

WORK EXPERIENCE

Software Engineer

Pixlee Turnto, Toronto, ON   Apr 2022 – Aug 2023 (1yr 5mos)

Environment: Ruby, Java, Python, ReactJs, BackboneJs, SQL

- Independently delivered projects and participated as a member of larger teams, with efficient high-quality code.
- Improved user experience by identifying similarities among maintenance tickets, followed by implementing preventative measures which significantly reduced their occurrence.
- Took the initiative and developed tools to improve the quality of life of administrators and security of data by reducing the need for error prone raw SQL queries.
- Optimized file processing tasks making them scalable therefore increasing the size and number of files we could convert.
- Remained versatile over a large tech stack which provided me the flexibility to assist colleagues and accelerate the completion of goals.

Full Stack Developer

NCX. Inc, Richmond Hill, ON   Oct 2020 – Apr 2022 (1yr 7mos)

Environment: AWS, .NET, ReactJs, SAP, SQL, VueJs

- Assisted in the planning, engineering and unit testing of many front end, middle tier, and back-end applications.
- Created new, independent application features that were seamlessly integrated, thereby greatly expanding the functionality of existing applications.
- Collaborated with analysts, designers and development team to ensure requirements were met and delivered in a timely manner.

Software Developer - Internship

Websdepot Technology, Toronto, ON   September 2019 – December 2019 (3mos)

Environment: PHP, REST API, JavaScript, SQL, SAP

- Solved challenging business needs by analyzing, designing and developing both front and back-end web frameworks.
- Significantly improved execution times of existing stored procedures by profiling and providing an update plan.

TECHNICAL PROJECTS

Background Check

Atbcheck.com   July 2018 - Present

Environment: C#, .NET Core, Azure, Electron, Node V8 Engine, C++, Python, JavaScript

- Built a web API and desktop application that gathers and processes data from multiple sources and allows companies to perform lookupswhich provides companies a convenient way to comply with the Financial Intelligence Unit of Trinidad and Tobago's laws.
